

# CRUD

With **CRUD**, one will not need to do all the manual wiring in constructing a CRUD entity. This element equips you with plenty of customization, making sure that you can achieve what you want.

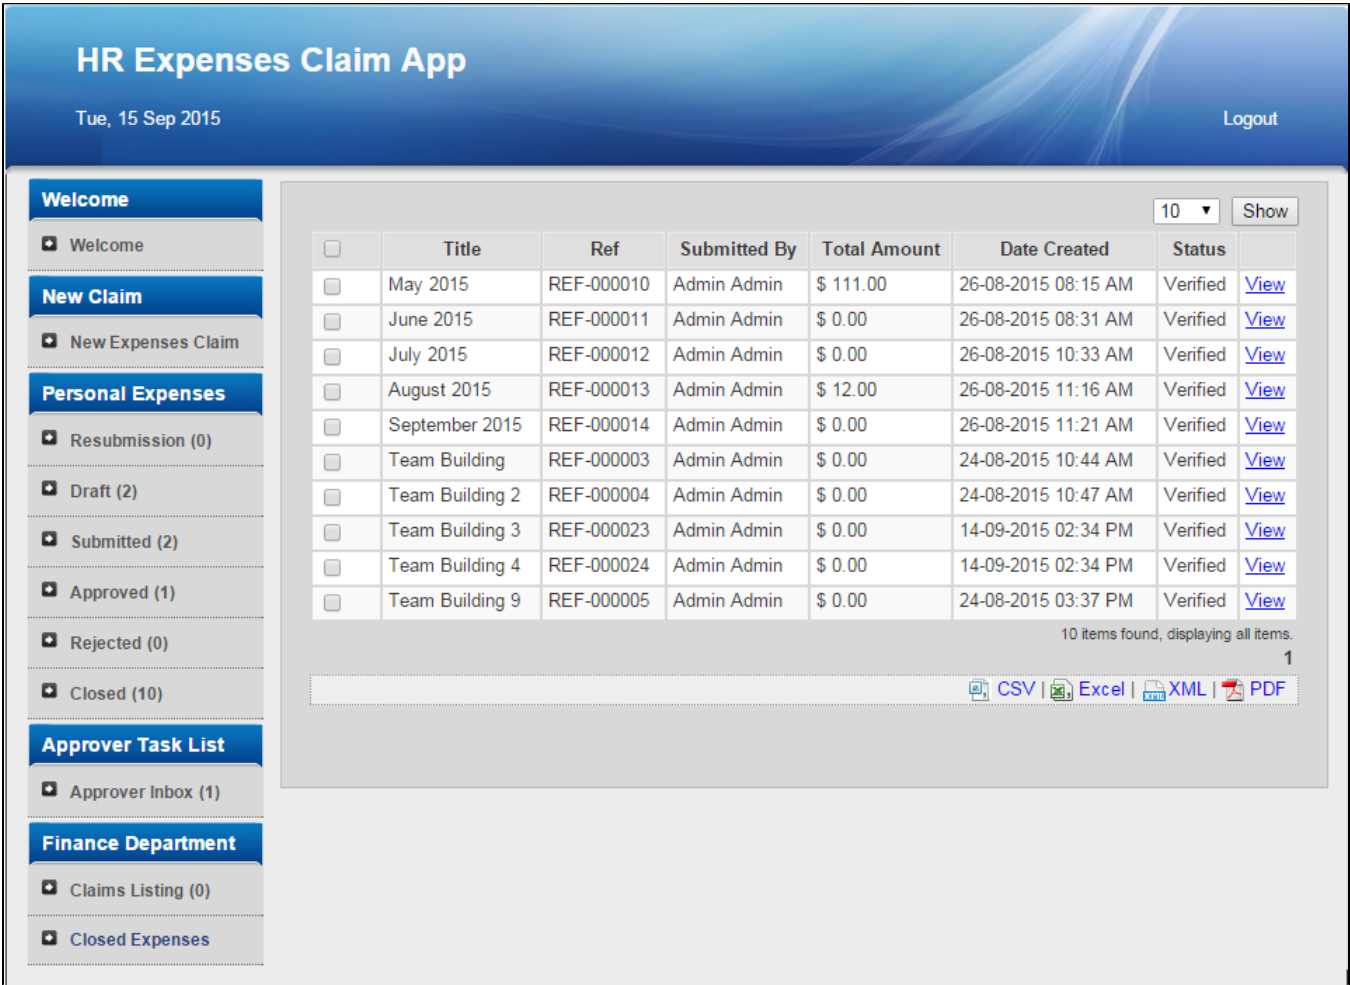

Figure 1: Screenshot showing CRUD taken from the sample HR Expenses Claim app

What's new in Joget Workflow v5

In Joget Workflow v5, the delete function is now able to delete dependency data.

### Edit CRUD

Edit CRUD > UI (List) > Actions (List) > UI (Add) > Actions (Add) > UI (Edit) > Actions (Edit) > Advanced

Custom ID	<input type="text" value="finance_all"/>
Label *	<input type="text" value="Closed Expenses"/>
List *	<input type="text" value="HR Expenses Claim Finance List"/>
Form (Add)	<input type="text"/>
Form (Edit)	<input type="text" value="HR Expenses Approval Detail"/>

Figure 2: CRUD Properties

Name	Description
------	-------------

Custom ID	Item link slug. Optional field. <div><div> <b>Unique field</b></div><div>Value defined here must be unique to the rest of the Userview Menus as the first matching name will be called upon.</div></div>
Label	Menu label. Mandatory field.
List	Datalist to load. Mandatory field.
Form (Add)	Target form to open when adding new record. Optional field. If this attribute is not mapped, then ability to Add is disabled.
Form (Edit)	Target form to open when editing existing record. Optional field. If this attribute is not mapped, then ability to Edit is disabled.
