

Import & Export

Joget's **Import & Export** feature gives you the flexibility and freedom to manage your apps. You can easily keep a backup of your app, move your app to the production server or to collaborate with others.

Export App

1. Log in to the console as administrator.
2. Click on **Design Apps** on the top navigation bar and choose your app.
3. In the app management page, click on **Properties & Export** on the left navigation bar.
4. Click on the **Export** button.

Import App

1. Log in to the console as administrator.
2. Click on the **Import App** option under your **Design App** menu.
3. Click the **Choose File** button.
4. Upload the exported app zip file.
