Usages

- Used to provide custom selection of users to workflow assignment in [Process Participant Mapping](#).
- A useable Process Participant plugin must extends [org.joget.workflow.model.DefaultParticipantPlugin](#) abstract class

Abstract Class

org.joget.workflow.model.DefaultParticipantPlugin

- Under wflow-wfengine module
- Extended [org.joget.plugin.base.ExtDefaultPlugin](#). Please refer to [Plugin Base Abstract Class and Interface](#).
- Implemented [org.joget.plugin.property.model.PropertyEditable](#). Please refer to [Plugin Base Abstract Class and Interface](#).
- A base abstract class to develop a Process Participant plugin.

Method Detail

Abstract Methods

```
getActivityAssignments

java.util.Collection<java.lang.String> getActivityAssignments(java.util.Map props)

    Gets usernames for the assignment.

    A org.joget.workflow.model.WorkflowActivity object is passed as "workflowActivity" property.
```

Plugin Properties Options

- Please refer to [Plugin Properties Options](#) for more information.
