

Google Drive Storage Integration

Take note that this feature is only available to customers using [Joget On Demand](#) currently. There are 2 ways for getting Google Drive integration to your copy of Joget.

Joget through Google Apps Marketplace

There is no configurations whatsoever needed to tie your Joget to your company's Google Apps account as you are signing up through Google Apps Marketplace itself.

1. Sign up for new [Joget Workflow app](#) from [Google Apps Marketplace](#).
2. Once your Joget account is created, you are now ready to add [Google Drive File Upload](#) into your Joget form.

Joget without going through Google Apps Marketplace

1. Please see [Google API Configuration](#).
2. Once you have performed the step above, you are now ready to add [Google Drive File Upload](#) into your Joget form.

Uploading files to Google Drive

Google Drive File Upload enables you to attach a file to a form and stores to a Google Drive account.

The screenshot displays the Joget Form Builder interface. On the left is a sidebar with a list of widgets under two categories: 'Enterprise' and 'Google'. The 'Google' category is expanded, and the 'Google Drive File Upload' widget is highlighted with a red box. The main workspace shows a form layout with several sections: 'Email' (text input), 'Login Details' (fields for Desired Username, Password, and Verify Password), 'Approval Section' (Status dropdown set to 'Approved' and a Comments text area), and a 'Section' containing an 'Attachment' widget. The Attachment widget is highlighted with a red box and contains the text 'Drop files here or click to upload.' The bottom right corner of the interface has the copyright notice '© Joget DX - Joget Inc. All Rights Reserved.'

Figure 2: Google Drive File Upload Properties

Name	Description
ID	Element ID (By declaring as "receipt", a corresponding database table column "c_receipt" will be created)
Label	Element Label to be displayed to end user.
Google Drive Email	Define an existing Google Apps account email for file storage.
Google Drive Base Folder	Declare a folder name as the base for file storage.
