

Permission Menu

Definition

The **Permission Menu** allows you to configure category permissions for user-defined groups in run-time.

This feature alleviates the need to go into the userview builder to manually adjust for every category.

Permissions	<table border="1"> <tbody> <tr> <td>Permission Key</td> <td>Id to match against userview categories. See Figure 3 & 7 for reference.</td> </tr> <tr> <td>Permission Label</td> <td>Permission list name. See Figure 1 & 3 for reference.</td> </tr> <tr> <td>Category</td> <td>Group label. Category to group similar permission labels under. See Figure 1 & 3 for reference. Optional Field.</td> </tr> </tbody> </table>	Permission Key	Id to match against userview categories. See Figure 3 & 7 for reference.	Permission Label	Permission list name. See Figure 1 & 3 for reference.	Category	Group label. Category to group similar permission labels under. See Figure 1 & 3 for reference. Optional Field.
Permission Key	Id to match against userview categories. See Figure 3 & 7 for reference.						
Permission Label	Permission list name. See Figure 1 & 3 for reference.						
Category	Group label. Category to group similar permission labels under. See Figure 1 & 3 for reference. Optional Field.						

Enable Refined Controls?

Allows administrators to implement intricate user permission configurations per group.

Important Note

Once this feature is enabled, only users with **administrative** access can manage the permission.

As opposed to Figure 2, when configuring permission, you will be brought to the following screen for finer permission control.

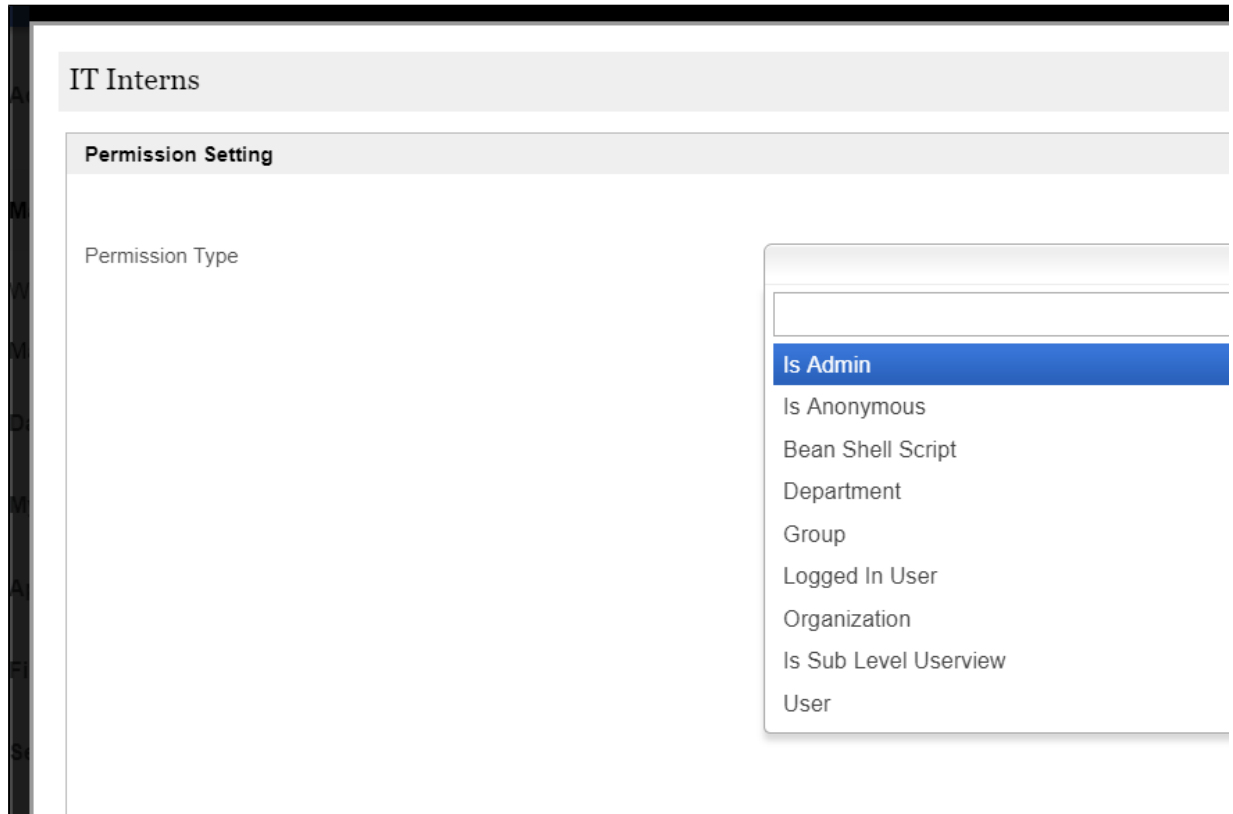

Figure 4: Enabled Refined Controls

How to use this permission plugin in a userview category

In the userview category that you wish to manage its permission via this plugin, edit the category's permission as shown in figure 5.

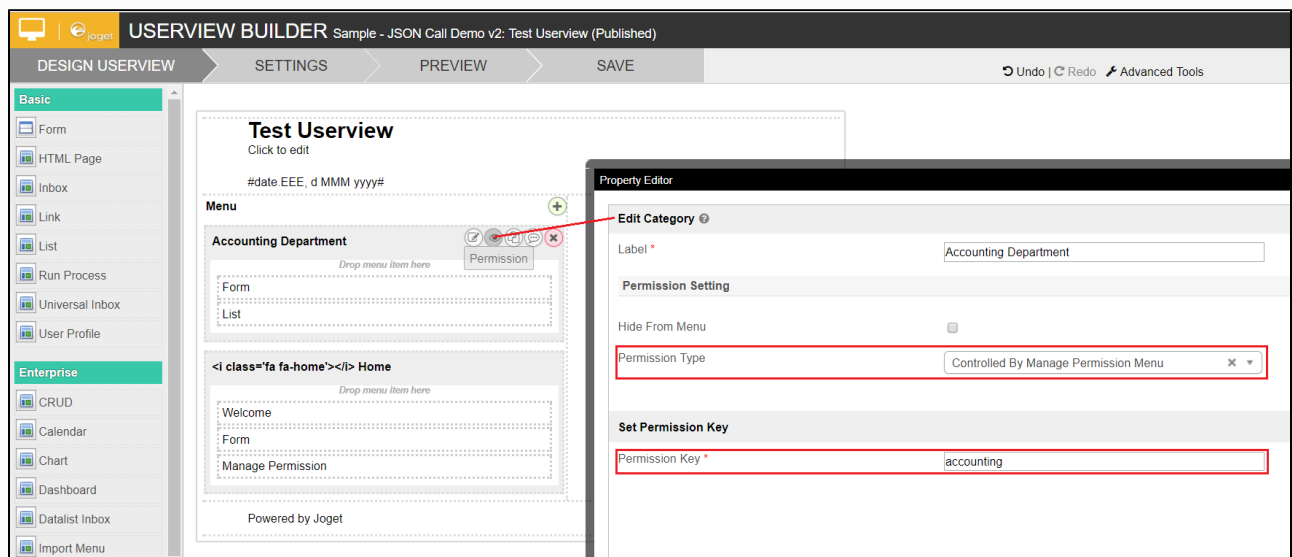

Figure 5: Adding permission to an userview category

Edit Category ⓘ

Edit Category > Permission Type (Controlled By Manage Permission Menu)

Label *

Permission Setting

Hide From Menu

Permission Type

Figure 6: Change "Permission Type" to grant permission to Permission Menu

Set Permission Key

Edit Category > **Set Permission Key**

Permission Key *

Figure 7: Assigning "Permission Key" to Category to match against in Permission Menu

After setting up the Permission Menu, remember to configure all the respective userview categories.

Note that, multiple categories can use the same permission key. Setting up as such will grant multiple categories to a permission group.
