

ID Generator Field

ID Generator Field is used to produce a running number based on an [Environment variable](#). To learn more about its usage, refer to [Generate Reference ID](#).

The screenshot shows a 'Proposal Form' with a header bar containing the text 'Reference No' and 'AUTO'. Below the header, there are several form fields: 'Account' with a dropdown menu showing 'Phillip', 'Title *' with an empty text box, 'Description' with a large empty text area, 'Attachment' with an empty text box and a 'Browse...' button, and 'status' with a dropdown menu showing 'pending'. A 'HIDDEN FIELD' label is visible in the bottom right corner of the form.

Figure 1: ID Generator Field

The screenshot shows the 'Edit Id Generator Field' dialog box. The title is 'Edit Id Generator Field' and the subtitle is 'Edit Id Generator Field > Workflow Variables'. The dialog contains the following fields:

- ID ***: refNo
- Label ***: Reference No
- Environment Variable Name ***: refNo
- Format ***: REF-??????
- Hidden?**:

Figure 2: ID Generator Field Properties

ID:	Element ID
Label	Element Label
Environment Variable Name	Name of the environment variable to be used to keep the running number
Format	Determines the pattern of the generated value (e.g., "REF-?????" will yield "REF-00001")
Hidden?	Determines if the element should be made visible in the form

You may map the generated value of this element to a workflow variable.

Read more about [Workflow Variables](#).

FAQs

1. The format is REF-??? and the last value is REF-999, what will be the next generated string/number?
The next generated value will be REF-1000. The ? symbol is mainly used to fill up the leading zeros in a number.
