

Hash Variable Plugin

- [Description](#)
- [Abstract Classes](#)
- [Sample Plugin](#)
- [Related Community Plugin](#)

Description

Hash Variable Plugins are used to extend support for processing hash variables.

Abstract Classes

org.joget.apps.app.model.DefaultHashVariablePlugin

```
// Variables
private Map<String, Object> properties;

// Abstract and Interface Methods
public String getName();

public String getDescription();

public String getVersion();

public String getLabel();

public String getClassName();

public String getPropertyOptions();

public String getPrefix();

public String processHashVariable(String variableKey);

// Available Methods
public Map<String, Object> getProperties();

public void setProperties(Map<String, Object> properties);

public Object getProperty(String property);

public String getPropertyString(String property);

public void setProperty(String property, Object value);

public User getCurrentUser();
```
