

# Radio

**Radio** is one of the generic HTML Form input elements. It has the same setup as [SelectBox](#).

The image shows a screenshot of a web form titled "Proposal Form". The form has a header bar with the title "Proposal Form" and a "Drag This Column" instruction. Below the header, there are several input fields. The first field is labeled "Reference No" and contains the value "AUTO". The second field is labeled "Account" and contains four radio button options: "Phillip", "Sudae", "Warren", and "Wendy". The "Account" field is highlighted with a white background. Below the "Account" field, there is a field labeled "Title" with a red asterisk next to it, indicating it is a required field. The form is enclosed in a dashed border.

**Figure 1: Radio**

For documentation on Radio properties, please refer to [SelectBox Properties](#).
