

# Preset Form Data Tool

The **Preset Form Data Tool** initialize data set in form. It is particularly useful on the initial set-up of a new application.

**Configure Preset Form Data Tool**

Configure Preset Form Data Tool > Data

Form \*

Fields \*

firstName	<input type="button" value="↑"/> <input type="button" value="↓"/> <input type="button" value="✖"/>
lastName	<input type="button" value="↑"/> <input type="button" value="↓"/> <input type="button" value="✖"/>

**Figure 1:** Selection of Form and fields in Preset Form Data Tool.

**Data**

Configure Preset Form Data Tool > Data

Data \*

Put your data in CSV format. Separate Field data with comma (,) and new record with new line (Enter)

```
cat, grant
clark, kent
```

**Figure 2:** Data entry in Preset Form Data Tool.

On the example above, the tool will insert 2 new records into the "Contact Form" tables with each line representing one record row.
