

Password Change on First Login

Enforcing a user to change password on first login

Joget provides an ability to administrators to force all users to change their password on the first login.

This can be activated using Secured enhanced directory manager. Here are the steps below and an image describing the setting

Go to **System Settings>Directory Manager Settings>Configure Plugin(Security Enhanced Directory Manager)>Default Directory Password Policy**

Check "Require change on First Login" to enable the dialog for a user to change his/her password on first login.

Plugin Configuration

Default Directory Password Policy

General > Default Directory Password Policy > Notification > External Directory Manager

Require Password Change on First Login

Generate Random Password

Enable Forgot Password

Forgot Password Link Validity Period (Minutes)

Number of Unique Passwords Before Re-use
