

Section

Section is the placeholder to hold Form Elements. Each section has one column in it by default.

Figure 1: Section highlighted in blue in sample HR Expenses Claim app

Screenshots in this article obtained from http://localhost:8080/jw/web/console/app/hr_expense/1/form/builder/hr_expense_new

Figure 2: Section Properties

Name	Description
ID	Element ID Since the section is not an input field, one may leave it as it is.
Label	Section Label

Figure 2: Section - Data Binder

Name	Description
Load Binder	Optional by default. When it is not set, it will use the parent's binder. You may override this behavior by using its own designated binder by defining it.
Store Binder	Optional by default. When it is not set, it will use the parent's binder. You may override this behavior by using its own designated binder by defining it.
