

# Password Format

## Configuring the mandatory characters for password

Joget allows users to create and use a password as per configured password format. This allows the administrator to have their password policy defined for all the users

The following are the steps to implement password rules.

Go to System Settings > Directory Manager Settings > Configure Plugin(Security Enhanced Directory Manager) > Default Directory Password Policy

By default, all the characters are checked. Admin can edit those.

## Plugin Configuration

### Default Directory Password Policy

General > Default Directory Password Policy > Notification > External Directory Manager

Forgot Password Link Validity Period (Minutes)

Number of Unique Passwords Before Re-use

Password Minimum Length

Password Mandatory Characters

- At least 1 upper case character in password.
