

# Publish Apps

Use **Publish Apps** to give users access to an application. By publishing an application, you are making it visible to its users.

The screenshot shows a web application interface with a green header and a left sidebar. The header contains a navigation bar with four steps: Home (Welcome Page), 1 Setup Users (Setup Organization & Users), 2 Design Apps (Workflow, Forms, etc.), 3 Run Apps (Run Apps), and 4 Monitor Apps (Monitoring & Reports). The sidebar lists five categories: 1 Processes, 2 Forms, 3 Lists, 4 Userview, and 5 Properties & Export. The main content area is titled 'Manage App Version' and displays a table with one row of data. Below the table is a pagination control showing 'Page 1 of 1' and 'Displaying 1 to 1 of 1 items'. At the bottom, there are five buttons: 'New Version', 'Publish', 'Unpublish', 'View', and 'Delete'.
