

Text Field Filter

Text Field Filter is the default search filter. It allows one to find information by typing a search criteria in the text field.

The screenshot shows a data list interface with a search filter applied. At the top right, there is a search bar containing the text "Account Name" and a "Show" button. To the left of the search bar is a dropdown menu showing "10". Below the search bar is a table with the following columns: "ID", "Account Name", "Country", and "State". The table contains four rows of data:

	ID	Account Name	Country	State	
<input type="checkbox"/>	123	Hugo Lim			Contacts New Contact
<input type="checkbox"/>	124	Sarah			Contacts New Contact
<input type="checkbox"/>	125	Michael			Contacts New Contact
<input type="checkbox"/>	126	Julia			Contacts New Contact

Below the table, it says "4 items found, displaying all items." and a page number "1". At the bottom right, there are export options: "CSV", "Excel", "XML", and "PDF".
