

Update via Saved XPDL

The screenshot shows the Joget Workflow Enterprise interface. At the top, there is a navigation bar with the logo and the text "JOGET WORKFLOW ENTERPRISE". To the right of the logo are links for "Home", "Inbox", "Profile (admin)", and "Logout". On the left side, there is a sidebar menu with the following items: "Design A" (with a pencil icon), "HR Expenses C" (with a document icon), "App" (with a document icon), "Version 1" (with a document icon), "P" (with a document icon), "1 Forms & UI" (with a document icon), "2 Processes" (with a document icon), "3 Properties &" (with a document icon), and "All Apps" (with a document icon). The main content area is titled "Update via Saved XPDL" and contains a "Process XPDL File:" label, a "Choose File" button, and the text "No file chosen". Below this is an "Upload" button. There is a close button (X icon) in the top right corner of the dialog box.

The option is available for App Designer to quickly upload the .xpd file locally to Joget Workflow to update it's process design.

 Make sure that you are uploading the .xpd file with the matching App ID as the current App.
