

SelectBox

SelectBox is one of the generic HTML Form input elements.

The snapshot build of the form shown below is taken from the CRM application found in Joget's installation package.

The image shows a 'Proposal Form' with several fields. At the top, there is a 'Reference No' field with the value 'AUTO' and a 'Drag This Column' instruction. Below it is a 'SelectBox' for 'Account' with 'Phillip' selected. Other fields include 'Title *', 'Description', 'Attachment' with a 'Browse...' button, and 'status' with the value 'pending'. A 'HIDDEN FIELD' label is visible at the bottom right.

Figure 1: SelectBox

The image shows the 'Edit Select Box' configuration dialog. It has a breadcrumb trail: 'Edit Select Box > Choose Options Binder > Choose Validator > Workflow Variables'. The fields are: 'ID *' with value 'account', 'Label' with value 'Account', 'Value' (empty), 'Size (Rows)' (empty), 'Multiple Selection' (checkbox), 'Readonly' (checkbox), 'Display field as Label when readonly?' (checkbox), 'Options' (table with columns 'Value', 'Label', 'Grouping' and a '+' button), and 'Field ID to control available options based on Grouping' (empty).

Figure 2: SelectBox Properties

ID	Element ID
----	------------

Label	Element Label
Value	Default Value
Size (Rows)	Number of rows to show
Multiple Selection	Allow multiple selection
Readonly	Determines if the element is editable
Display field as Label when readonly?	Displays the value of the element as plain text when element is set to "Readonly".
Options	Presents selection options. The options can also be defined using the Options Binder .
Field ID to control available options based on Grouping	Limits the selection options available based on another input field's value

One may extend the capabilities of this element by adding a validator as well as mapping its value to a workflow variable.
