

List

Definition

List allows one to integrate Datalist created using the [Datalist Builder](#) into the Userview.

Performance

You can configure the **Performance** settings in this Userview Element to cache existing content for improved performance and loading speed.

Read more at [Performance Improvement with Userview Caching](#).

The screenshot shows the 'HR Expenses Claim App' interface. At the top, there is a header with the date 'Tue, 15 Sep 2015' and a 'Logout' button. On the left, there is a navigation menu with sections: 'Welcome' (containing 'Welcome' and 'List'), 'New Claim' (containing 'New Expenses Claim'), and 'Personal Expenses' (containing 'Resubmission (0)', 'Draft (2)', 'Submitted (2)', 'Approved (1)', and 'Rejected (0)'). The main content area displays a table of claims with columns: Title, Ref, Submitted By, Total, and Date Created. The table contains 10 rows of data. Below the table, there is a pagination control showing '10' items per page, a 'Title' dropdown, and a 'Show' button. At the bottom right of the table area, it says '27 items found, displaying 1 to 10.' and provides navigation buttons for '1, 2, 3'. At the very bottom of the interface, there are links for 'CSV', 'Excel', 'XML', and 'PDF'.
