

Duplicate Value Validator

Duplicate Value Validator is used to prevent duplicate values and enforce an input format.

Configure Duplicate Value Validator

Edit Text Field > Choose Validator > **Configure Duplicate Value Validator** >

Form ID *

Field ID *

Mandatory

Regular Expression Format Check

Error Message Shown When Format Wrong

Figure 1: Configuration Tab for Duplicate Value Validator

Example:

Implementing validation on the **Phone** field to make it:

- mandatory
- unique
- adhere to a specific format using a regular expression (more on **Regular Expression** at <http://www.regular-expressions.info/>)
