

Advanced Form Row Data Binder

Advanced Form Row Data Binder is an extended version of the default Form Data Binder. It allows you to add in Filter Conditions in a guided and friendly manner.

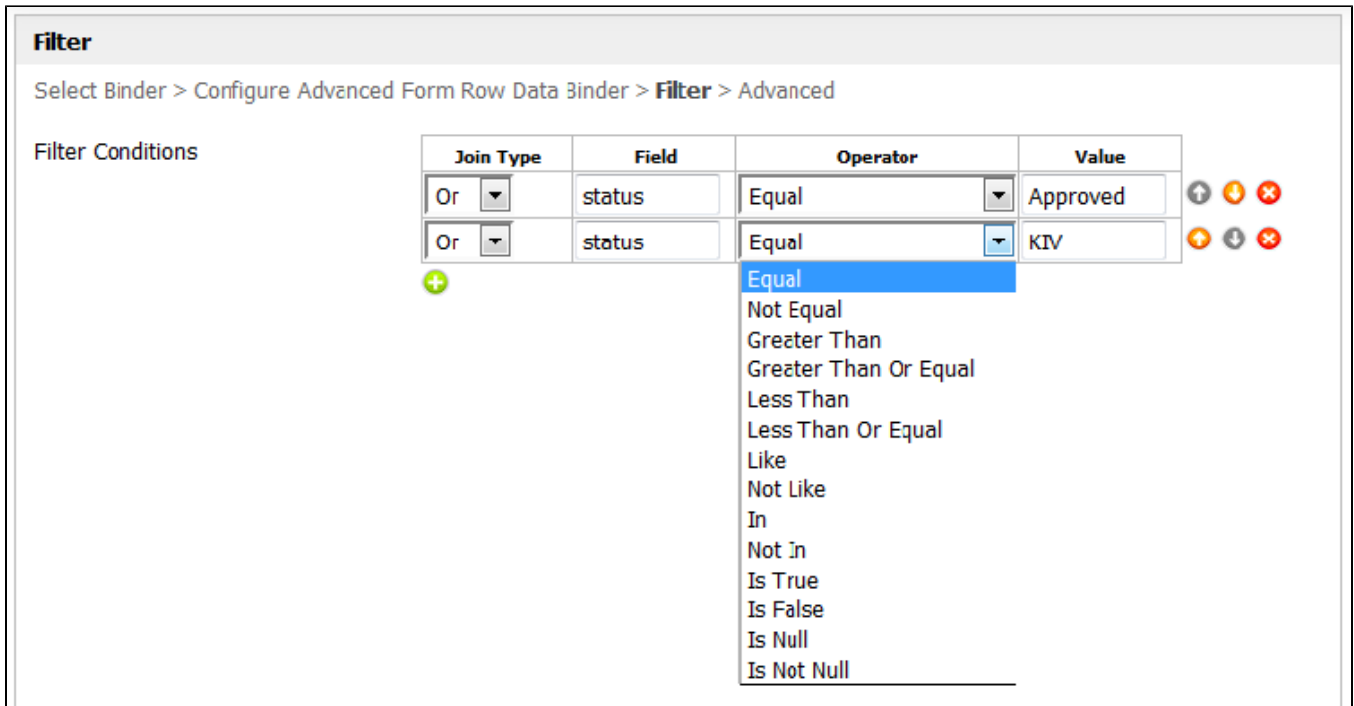

Figure 1: Filter properties in Advanced Form Row Data Binder

In the example shown above, one is applying the following filters to the listing:

1. Value of field "approval_status" is "Approved" **OR**
2. Value of the field "approval_status" is "KIV".

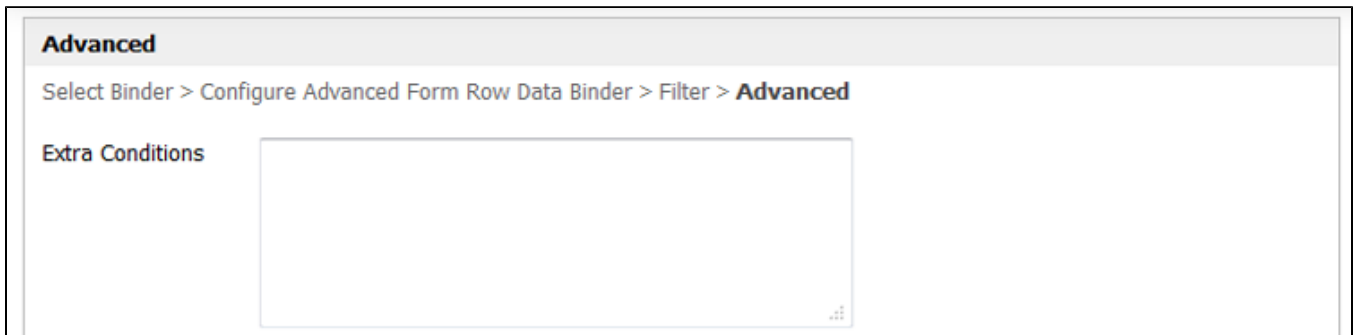

Figure 2: Advanced properties in Advanced Form Row Data Binder

One may also specify **Extra Conditions** for filters that are not available in the **Filter Conditions** on the previous tab. For example,

```
e.customProperties.amount BETWEEN 1000 AND 5000
```

Note that the keyword "e.customProperties." must be used as the prefix before specifying the usual Form Field ID.
