

Installation on Mac OSX

1. Install the **Java** Runtime Environment (JRE) or Java Development Kit (JDK) version 8 and above from <http://java.oracle.com>
2. Install **MySQL** Server version 5.5 and above from <https://www.mysql.com/downloads/>
3. Download the Joget Workflow Linux tar.gz bundle from <http://www.joget.org/download>
4. Create a new directory and extract the Linux tar.gz bundle into that directory
5. Execute the bundled **Apache Tomcat** application server: `./tomcat8.sh start`
6. Access the **App Center** at <http://localhost:8080/jw>
7. Follow on with [Setting Up Database](#).

For the Community Edition, you will need to delete the default datasource configuration file first before setting up the database:

```
rm wflow/app_datasource.properties
```
