In themes that support responsive design, Userview Theme such as [V5 Janux Theme](#) will display table in responsive mode. In themes that do not support responsive design, tables will be displayed without responsive mode. You can explicitly enable or disable such behavior by adding this script into the Userview Theme's settings such as the header.

Script to enable/disable responsive table

```
<script>
var _enableResponsiveTable = true;
</script>
```
