

Chart

Definition

Chart allows you to define your own SQL query to determine the charts that you would like to generate, ranging from a number of graph types.

Edit Chart

Edit Chart > Data Binder & Chart Data Mapping > Chart Options

Chart Type *

Chart Title

Data Binder *

< Prev Next >

Figure 1: Chart Properties

Name	Description
Chart Type	<ul style="list-style-type: none">• Area Chart• Bar Chart• Bubble Chart• Candlestick Chart• Donut Chart• Line Chart• Open High Low Close Chart (OHLC Chart)• Pie Chart• XY Chart
Chart Title	Chart Title to be displayed as part of the generated graph.
Data Binder	When Datasource is set to "Using Data Binder", this option will show up. Please see Datalist Binder for the available binder to use.

Figure 3 : Chart Properties - Chart Options

Name	Description
X-axis Label	X-axis Label
X-axis display as	<ul style="list-style-type: none"> ● Category ● Number ● Date
Y-axis Label	Y-axis Label
Y-axis Prefix	Y-axis Prefix
Show Legend?	If checked, the legend will be shown in the generated graph.
Width (px)	Width in character. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p>Example</p> <p>640px</p> </div>

Height (px)	Height in character. <div data-bbox="256 184 878 321"><p data-bbox="267 205 324 226">Example</p><p data-bbox="267 262 332 283">480px</p></div>
-------------	--

Colors

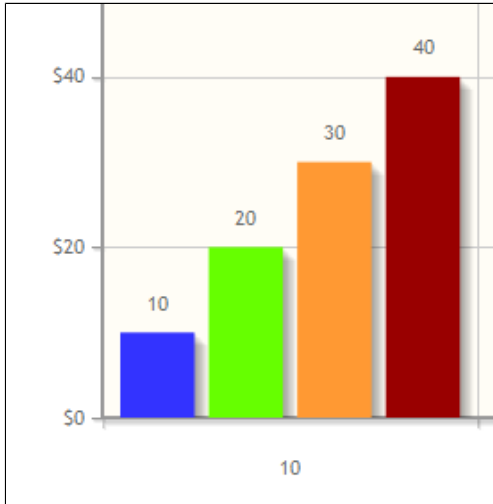

Series color. Optional field.

Comma-separated values (CSV) of color codes.

Example:

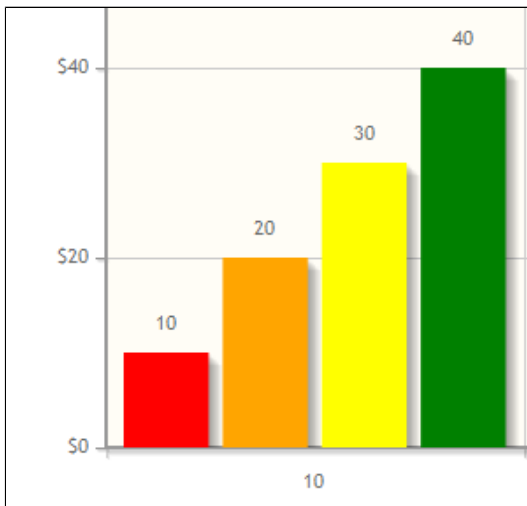

Example

```
#3333FF, #66FF00, #FF9933, #990000
```

Example

```
red, orange, yellow, green, blue, indigo
```

What are the default colors?

<http://stackoverflow.com/questions/18332440/what-are-the-jqplot-default-series-colors>

Alignment

- Left
- Center
- Right

Margin Bottom

Bottom Margin of Chart

Example

10px
