

Send JasperReports PDF in Email Tool

1. In the Userview, go to the JasperReports menu item.

2. In the menu, look for the **PDF** link at the bottom right of the screen. Copy the link.

3. In the **Email Tool**, go to the **Attachments** tab.

Paste the link into the path in the **Files** attributes. Name the **File Name** to your preference.

The screenshot shows the 'Plugin Configuration - Tool 1 (tool1)' interface. The 'Attachments' tab is active, showing configuration options for email attachments. The 'Form' field is a dropdown menu. The 'Form Upload Fields' section has a 'Field ID' input field. The 'Files' section contains a table with columns for 'Path', 'Type', and 'File Name'. A single entry is shown with the path 'http://localhost:8080/jw/webi', type 'URL', and file name 'report.pdf'. There are plus and minus icons for adding and removing entries.

Path	Type	File Name
http://localhost:8080/jw/webi	URL	report.pdf
