Request Joget License Steps

This article will describe the steps to activate your Joget Enterprise License.

1. Obtaining your System Key

- Login to the Joget App Center as the administrator (default administrator username is "admin").
- From the Admin Bar, click on **Settings**.
Note down the product **edition and version** that you have installed - (i.e. Joget DX Enterprise) and version (i.e. Version 7)

The screenshot shows the 'System Settings' interface. On the left is a navigation menu with options: System Settings, General Settings, Datasource & Profile Settings, Directory Manager Settings, Manage Plugins, and Manage Messages. The main content area is titled 'SYSTEM' and contains two sections: 'Version' and 'License'. The 'Version' section shows '© Joget DX Enterprise - Joget Inc. All Rights Reserved.' and 'Version: 7.0-SNAPSHOT - build aa6fab6', with a 'System Information' button. The 'License' section shows 'License: [Joget DX Enterprise 7](#)' (with a pencil icon), 'Licensed To: Free', and 'Licensed Users: 3', with a 'Purchase License' button.

- Click on the license link to bring up a pop-up window.
- Please refer to the following screenshot to get the system key. The system key is a unique key that is different for every Joget installation.

The screenshot shows a 'LICENSE' pop-up window. It has a title bar with 'LICENSE' and a close button. The window contains a form with the following fields: 'System Key' (displaying '33a8c82d34a1198386e910634d7cac54'), 'Admin Username' (with 'admin' entered), 'Admin Password' (with '.....' entered), and 'License' (with a large empty text area). A 'Submit' button is located at the bottom left of the window.

- What you will need is the alphanumeric string, something like this "a4021e833fea1224d13fbff6c505780f". Copy the system key into your clipboard. Ensure that you only copied the string of alphanumeric text, no pre or trailing "spaces". See the screenshot above.

The Joget System Key is tied to the:

1. **Server network MAC address.**
2. **Database profile name.**

Joget license is tied to the Joget edition: v6 or DX; Professional or Enterprise Edition.

Take note that if any of the above changes, you will require a new license reactivation.

2. Requesting for License Key

- On your web browser, navigate to our [Joget License Activation site](#).
- Select **Request for Enterprise License** from the menu to access the license request form. Refer to the following screenshot.

- Fill up the form. You will need to paste the **System Key** alphanumeric string that you have copied earlier.
- In "Licensed To", the naming convention is as the following:-
 - Alphanumeric, dot, underscore, hyphen, space or round brackets are accepted.
 - First character must be alphanumeric.
 - Last character must be alphanumeric or a closing round bracket.
 - Example:-
 - XYZ Inc (Production)
 - XYZ Inc. - Production
- Select the correct **license version** based on what you have identified earlier in Step 1.
- Select the appropriate **license category**. In most cases, the category would be "User-Based License" unless you have been instructed to select another category.
- Key in the **required users**. Selection is in a block of 5 users.
- When you are done, click on the submit button to submit your request.
- After you have submitted your "Request for Enterprise License" form, if **approved** (usually not more than 24 hours), you will receive an email with the "License" key. See the following screenshot for a sample email.

```

Thank you.

- You are now ready to activate your system.

3. Applying the license

- Make sure you are login as administrator. Similar to the first step, scroll down to the bottom and click on "Joget DX Enterprise 7" link to bring up the pop-up license activation window.
- Next, copy the "License" from your email and paste it here in the form field under "License".
- Ensure that you enter your correct administrator username and password.
- Next, click on the submit button to activate Joget. Please see the following screen shot for reference.

===LICENSE END=====
```

- The form will close after activation. You will need to **RELOAD** the page to check if the license activation has been successful or not.
- If everything went as planned, you will see the activated license with the "Licensed To" and "License Users" info prominently displayed.

Alternate Link To License Page

You can also access the license page via this URL: <http://localhost:8080/jw/web/console/home> (Change the domain name accordingly). Scroll down to the footer and click on the "License: Joget DX Enterprise 7" hyperlink.

 the license popup page

Joget License Based On Total Apps

You can request for a Joget license with apps count protection. For example, request a Joget license for unlimited users for a maximum of three apps only. The app license count applies to the first three apps based on **appID** in ascending order for published apps.

To request for a Joget license based on total apps, go to [license request](#) and select the following "License Category":

- License Category: **App Based License**
- Required Number of Apps: **5** (for example)

To exclude the app center from being counted, you can delete the default app center app and use the setting in "System Settings > General Settings > Default Userview" to another app.
