

Validity Period

Password Expiration Setting

User passwords can be configured to expire after a set duration. This allows administrators to expire account passwords and mandate users to reset their password.

Go to [System Settings](#) > [Directory Manager Settings](#) > [Configure Plugin\(Security Enhanced Directory Manager\)](#) > [Default Directory Password Policy](#).

Default Directory Password Policy

General > **Default Directory Password Policy** > Notification > External Directory Manager

Password Minimum Length	8	x ▾
