

Request App Protection

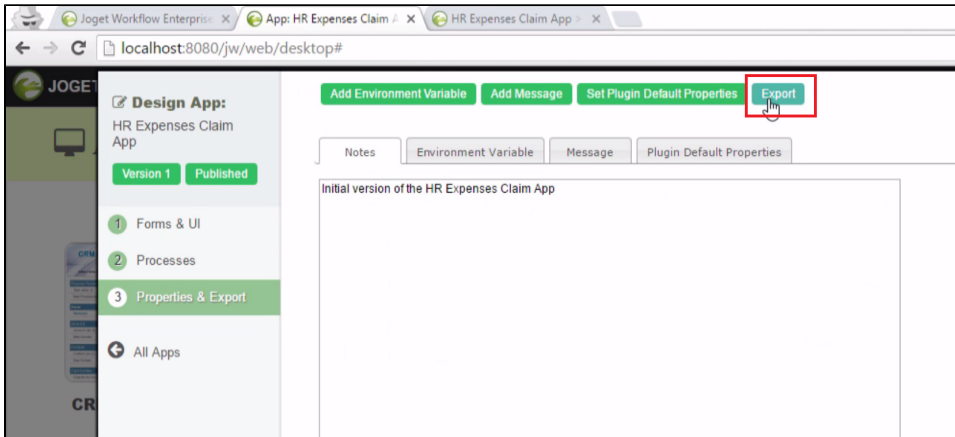

- [Instructions](#)
 - [1. Exporting the App](#)
 - [2. Request for App Protection](#)
- [Video Tutorials](#)

This article is only applicable to users who wants to import a copy-protected Joget Workflow app into their Joget Workflow server. The article will show you how you can activate the copy-protected app.

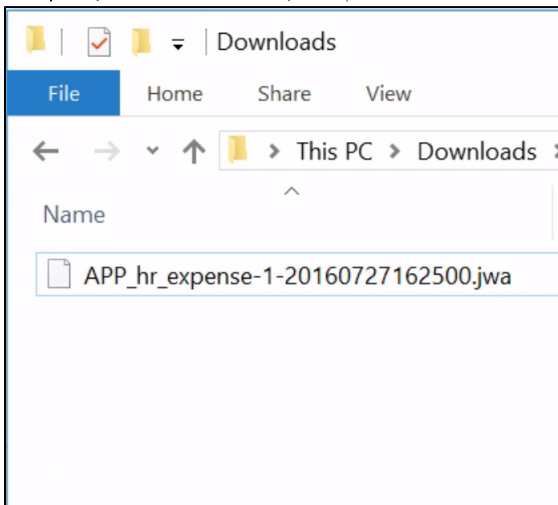

Instructions

1. Exporting the App

- From your Joget Workflow's App Center, go to your intended App's design.

- Click on **Properties & Export**.
- Click **Export**. A .jwa file will be downloaded to your computer.

2. Request for App Protection

- Open your web browser, navigate to our [License Activation site here](#).

- Click on **Request for App Protection**. Fill up all the fields and submit.

The screenshot shows the 'Request for App Protection' form within the 'Joget Workflow Enterprise License App' interface. The page has a blue header with the app name and a 'Home' link. A left sidebar contains navigation options: 'Home', 'Request for License', and 'Request for App Protection', with the latter being the active section. The main content area is titled 'Request for App Protection' and includes a sub-header 'App Information'. The form fields are as follows:

- App ID ***: A text input field containing 'hr_expense'.
- App Title ***: A text input field containing 'HR Expenses Claim App'.
- App Description**: A large text area containing 'HR Expenses Claim App test protection of app'.
- Require Activation (Tied to System)**: A checkbox that is currently unchecked.
- App ZIP ***: A file upload field with a 'Choose File' button and the filename 'APP_hr_exp...53123.jwa'.
- Additional Info (documentation, etc)**: A file upload field with a 'Choose File' button and the text 'No file chosen'.

- You will receive an email containing further instructions.
