

Importing an App

1. Joget apps are packaged files that contain form, datalist, userview and process definitions. Apps can be exported from another Joget installation, or downloaded from the **Joget Marketplace**.
2. To import an app, first login to the **App Center** as an administrator.
3. In the **Admin Bar** on the right, click on **All Apps**.
4. In the **All Apps** page, click on the **Import App** button along the top.

5. In the Import App dialog, select the app file, and click on **Upload**.
