

Script to read and interpret a Calculation Field

Hi there,

I need to write a javascript script that reads a calculation field in order to show a text but i'm not sure how to point the calculation field itself.

Eg. Calculation field: 2,45 --> (flooring: 2)

Text Shown: RELEVANT IMPACT

Calculation field: 1,23 --> (flooring: 1)

Text Shown: LOW IMPACT

Calculation field: 4,00

Text Shown: MASSIVE IMPACT

Thanks for your help
