Password Change on First Login

Enforcing a user to change password on first login

Joget provides an ability to administrators to force all users to change their password on the first login.

This can be activated using Secured enhanced directory manager. Here are the steps below and an image describing the setting

Go to System Settings>Directory Manager Settings>Configure Plugin(Security Enhanced Directory Manager)>Default Directory Password Policy

joget workflow	Home 1 Setup Users 2 Design Apps Welcome Page 1 Setup Organization & Users 2 Workflow, Forms, etc 3 Run Apps 4 Monitor Apps Monitoring & Reports	System Settings Profile (admin) Logout
Enterprise		(1) Click on System
	Plugin Configuration	Settings 🗶
General Settings	General (3) Select Default password policy General > Default Directory Password Policy Notification > External Directory Manager	
Directory Manager Settings	Show Login Info (e.g. Last Login Date)	
Manage Plugins (2) Click He	Failed Login Attempts for Account Lockout 3 -	
Manage Messages	Account Lockout Period (Minutes) 10 💌	
	Allow Session Timeout (Inactivity Timeout)	
	Hard Session Timeout (Hours) 8 💌	
	< Prev Next >	

Check "Require change on First Login" to enable the dialog for a user to change his/her password on first login.

Default Directory Password Policy		
Seneral > Default Directory Password Policy > N	otification > External Directory Manager	
Require Password Change on First Login		
Generate Random Password		
Enable Forgot Password
