- [Sample Plugin](#)
- [Related Community Plugins](#)

Description

The **Audit Trail Plugin** is triggered after a process-related event to provide extra processing capabilities (e.g., capturing reporting data or user notification).

Abstract Classes

org.joget.plugin.base.DefaultAuditTrailPlugin

```
// Variables
private Map<String, Object> properties;

// Abstract and Interface Methods
public String getName();

public String getDescription();

public String getVersion();

public String getLabel();

public String getClassName();

public String getPropertyOptions();

public Object execute(Map properties);

// Available Methods
public Map<String, Object> getProperties();

public void setProperties(Map<String, Object> properties);

public Object getProperty(String property);

public String getPropertyString(String property);

public void setProperty(String property, Object value);
```

Sample Plugin

Coming soon.
