

# Combine All Actions Into One Row

In this article, we will show you how to combine all action buttons into a single cell.

Before

10

Show

REQUEST	STATUS		
Automatic water dispenser	In Progress	Resolve	Edit
A set of computer	New	Accept	Edit
Magnets	Clarification Required		Edit
Pencil and pen	Resolved		Edit

4 items found, displaying all items.  
[CSV](#) | [Excel](#) | [XML](#) | [PDF](#)

After

10

Show

REQUEST	STATUS		
Automatic water dispenser	In Progress	Resolve	Edit
A set of computer	New	Accept	Edit
Magnets	Clarification Required	Edit	
Pencil and pen	Resolved	Edit	

4 items found, displaying all items.  
[CSV](#) | [Excel](#) | [XML](#) | [PDF](#)

In order to combine them, we can make use of the following sample CSS. You may need to amend them to suit your specific use case. We can then place the CSS into the Userview Menu's header or footer.

Custom Header

1<style>

2body .dataList td.row\_action {

3display: inline-block;

4float: left;

5padding: 0 !important;

6}

7

8th.row\_action.footable-visible {

9display: inline;

10}

11

12.row\_action\_inner a {

13padding: 10px;

14float: left;

15}

16</style>

Custom Footer

1

## CSS

```
<style>
  body .dataList td.row_action {
    display: inline-block;
    float: left;
    padding: 0 !important;
  }

  th.row_action.footable-visible {
    display: inline;
  }

  .row_action_inner a {
    padding: 10px;
    float: left;
  }
</style>
```
