

Change User Locale In Userview Header

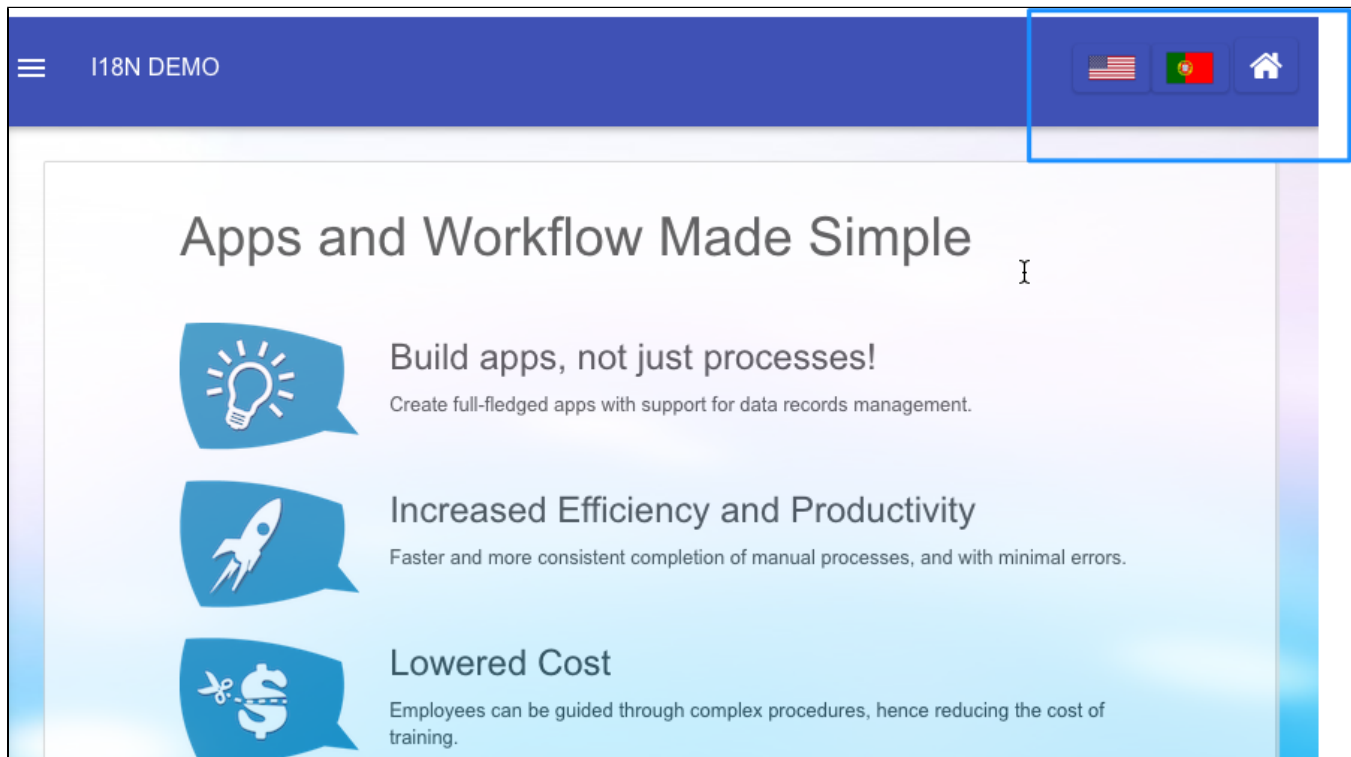

Figure 1: Userview Theme with Language Selector

1. Place the following code in "Sub Header" in DX Progressive Theme. Change line 2 and line 3 #appResource with country flag images.

```
<div id="languages">
  <li><a href="?_lang=en_US" class="btn waves-effect btn waves-button waves-float"></a></li>
  <li><a href="?_lang=pt_BR" class="btn waves-effect btn waves-button waves-float"></a></li>
</div>

<script>
$(function(){
  $("#page > header > div.navbar-inner > div > div.nav-no-collapse.header-nav > ul").prepend(
$("#languages li") );
});
</script>
```

2. Upload country flags using "Properties & Export" > "Add Resource".
