Figure 1: Options Value Formatter Properties

Name	Description
Options	<p>Options to be populated for the column value to be matched against.</p> <p>Column value will be matched against "value" and "label" will be displayed to the end user.</p>

Name	Description
Value	Option value.
Label	Option label.

The screenshot shows the 'Choose Options Binder' step of the 'Configure Options Value Formatter' wizard. The breadcrumb navigation at the top reads: 'General > Action Mapping > Formatter > Configure Options Value Formatter > Choose Options Binder'. The main area is titled 'Options Binder' and contains a search bar with a magnifying glass icon. Below the search bar, a list of options binders is displayed: 'Bean Shell Form Binder' (highlighted in blue), 'Default Form Options Binder', 'Department Options Binder', 'Grade Options Binder', 'Group Options Binder', 'Organization Options Binder', and 'User Options Binder'.
