

## Import PO File

This feature allows one to import the .po file generated from [Generate PO File](#).

The screenshot shows a user interface for importing a PO file. At the top, there's a navigation bar with a 'Design App:' button, 'Add Environment Variable', 'Add Message', and 'Set Plug...' buttons. Below the navigation is a sidebar on the left with tabs: 'Version 1' (selected), 'Process', 'Properties &...', and 'All Apps'. The main area has a title 'Import Message PO File' and a 'PO File' input field containing 'Choose File No file chosen'. Below the input field is a green 'Upload' button.
