

PagingUtils

Description

- org.joget.commons.util.PagingUtils
- Under wflow-commons module
- Utility method used for sorting and paging an ordered list of data

Code Sample

```
import java.util.List;
import org.joget.apps.app.service.AppUtil;
import org.joget.workflow.model.WorkflowProcess;
import org.joget.workflow.model.service.WorkflowManager;

WorkflowManager workflowManager = (WorkflowManager) AppUtil.getApplicationContext().getBean("workflowManager");
List<WorkflowProcess> processList = (List<WorkflowProcess>) workflowManager.getProcessList("crm");

//Sort it by process id
PagingUtils.sort(processList, "id", false);
```

Methods

sort

```
public static void sort(java.util.List list, java.lang.String field, java.lang.Boolean desc)
```

Sorts a list based on a field value of object in the list

sortAndPage

```
public static java.util.List sortAndPage(java.util.List list, java.lang.String field, java.lang.Boolean desc, java.lang.Integer start, java.lang.Integer rows)
```

Orders the list based on a field value of object in the list and returns the results of a page

sortMapByValue

```
public static java.util.Map sortMapByValue(java.util.Map map, java.lang.Boolean desc)
```

Sorts a map based on a value

subList

```
public static java.util.List subList(java.util.List list, java.lang.Integer start, java.lang.Integer rows)
```

Gets the results of a page from a List
