

# Hedera Ledger Pack

This plugin pack is in early development stages and **not** ready for production use.

Feel free to clone the source at [JogetOSS](#) and enhance/adapt to your requirements.

To operate the Hedera plugin pack on the **previewnet** or **testnet**, please create a Hedera Portal Profile.

See <https://docs.hedera.com/guides/testnet/testnet-access>.

- [Get Started](#)
- [Sample App](#)

## Introduction

The **Hedera Ledger Pack** integrates Hedera with Joget, and allows you to design Joget apps that interacts with the Hedera DLT.

This plugin pack contains these plugins:

- [Hedera Generate Account Tool](#)
- [Hedera Send Transaction Tool](#)
- [Hedera Mint Token Tool](#)
- [Hedera Token Management Tool](#)
- [Hedera Sign Scheduled Transaction Tool](#)
- [Hedera Explorer Link Form Element](#)
- [Hedera Account Load Binder](#)
- [Hedera Scheduled Transaction Load Binder](#)
- [Hedera Topic Management Tool](#)
- [Hedera Default Backend Configuration](#)
- [Hedera Account Hash Variable](#)

The plugin source codes can be found at [JogetOSS Github](#). Feel free to clone and customize to suit your needs.

To learn more about Hedera, see <https://hedera.com/>.

## Get Started

You can get started on building dApps with Joget either via:

- Download the [Hashgraph Application Studio](#).
- OR
- [Download](#) the Hedera Ledger Pack (**jar** file) & import the plugin into your Joget platform.

If you are installing the Hashgraph Application Studio, the plugin & sample app is already included by default.

## Sample App

(Updated as of 25-Sep-2023, on plugin pack version **8.0.0**)

This sample app below is a simple showcasing of integration with the various plugins within the Hedera Ledger Pack.

Do ensure that these plugins are installed in your Joget platform before trying out the sample app:

- [Hedera Ledger Pack](#) from JogetOSS

For **Joget DX8**:

APP\_hede...-DX8.jwa

Simply import & publish the app above into your Joget instance and start using.

There may be additional instructions/prerequisites to perform after importing the app. Do check the setup checklist on the homepage of the app.
