Introduction

Bootstrap Steps Display is a Form Element and Datalist Column Formatter that allows users to display status in steps with two presentation styles. For example, you can now display steps in icons with color in your form or datalist column.

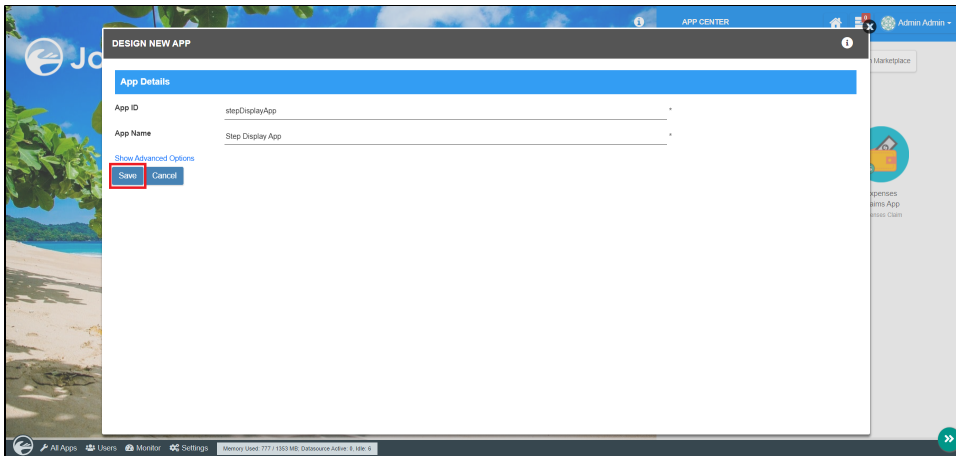

Get started

Steps To Use Steps Display Form Element Plugin

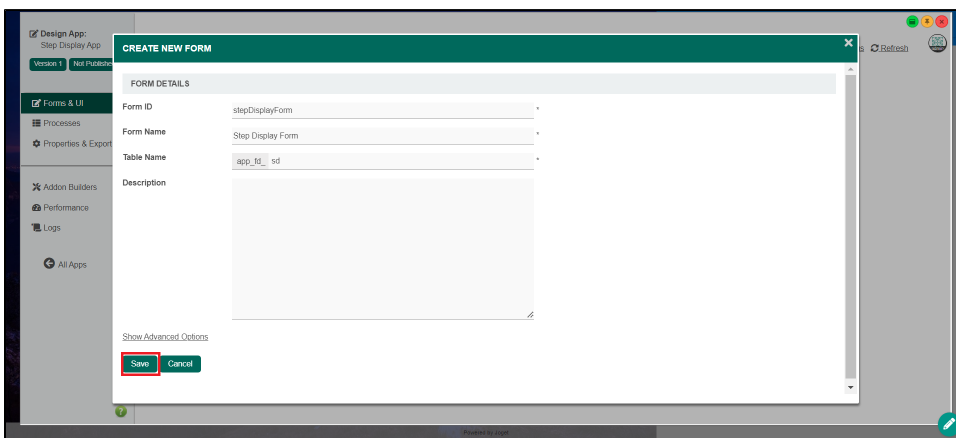

1. Start the Joget server and open the **App Center**.
2. Login as admin and click on **Design New App** or click on an existing application.

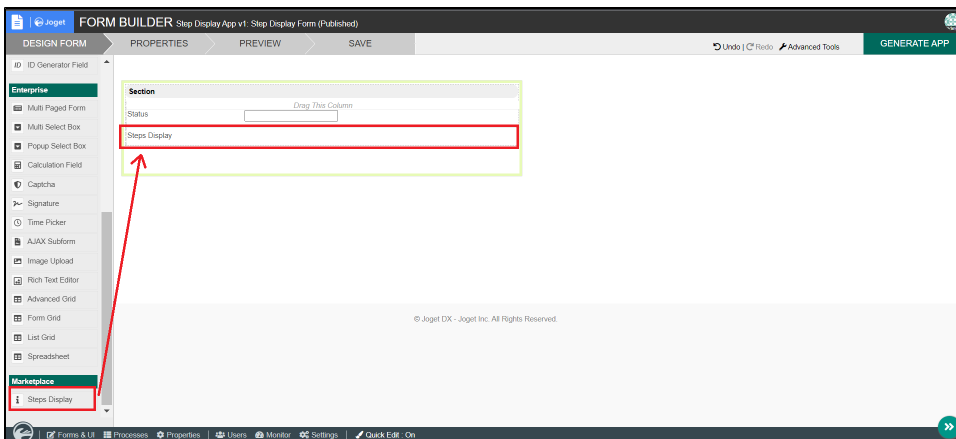

3. For a new application, fill up the App ID and App Name then proceeds to click on the **Save** button.

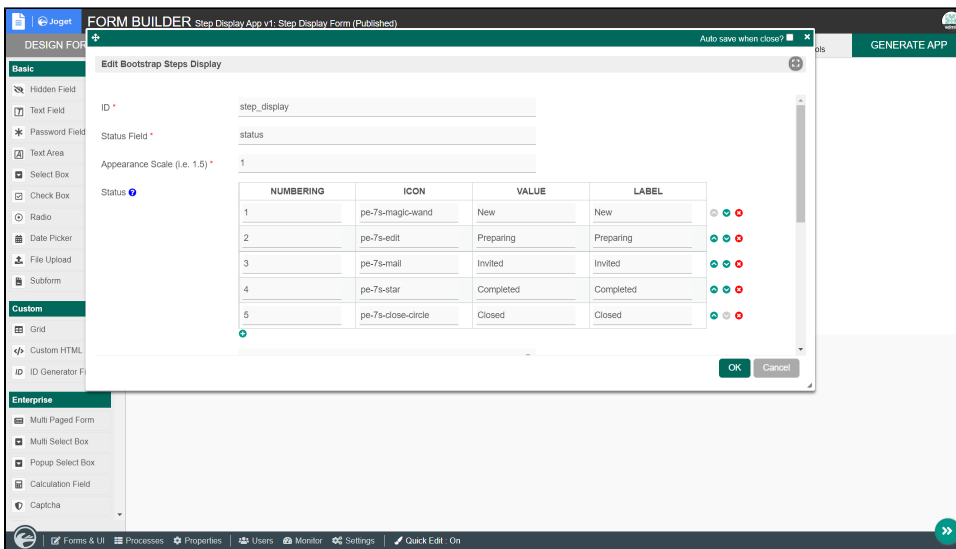

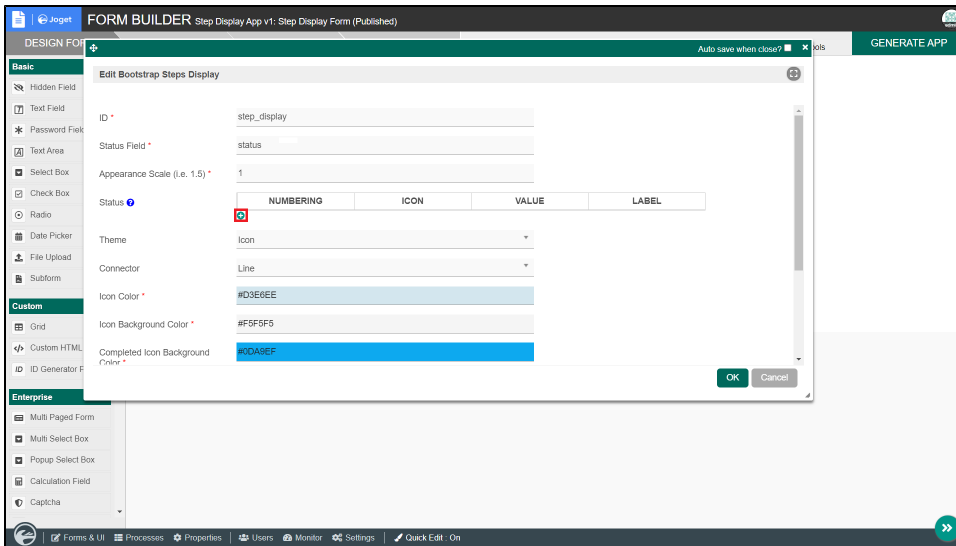

4. Create New Form, fill up Form ID, Form Name and Table Name then click on the **Save** button.

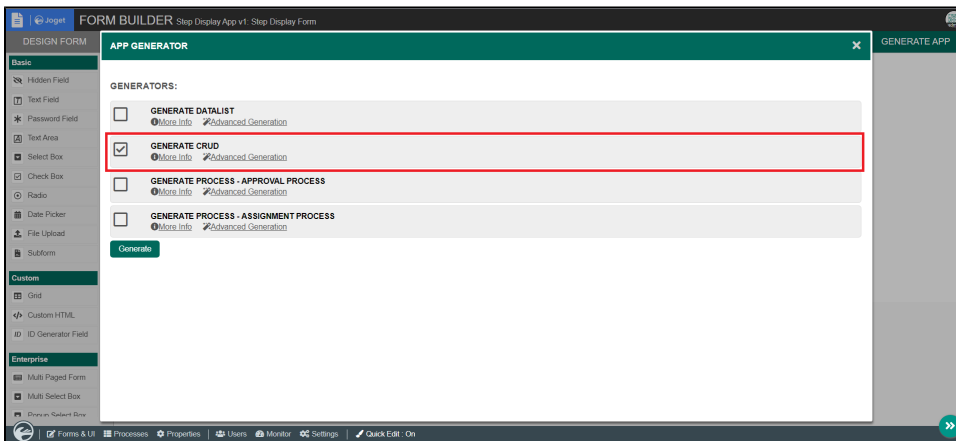

5. Fill up the form with a **Text Field** with the id as **status** and a Step Display form element then save the form.

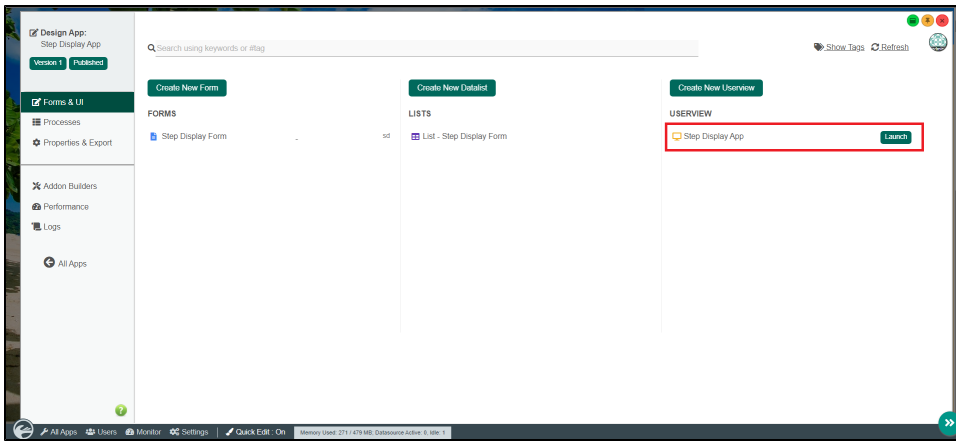

6. Edit the Step Display form element by adding a few status and selecting color then save the form.

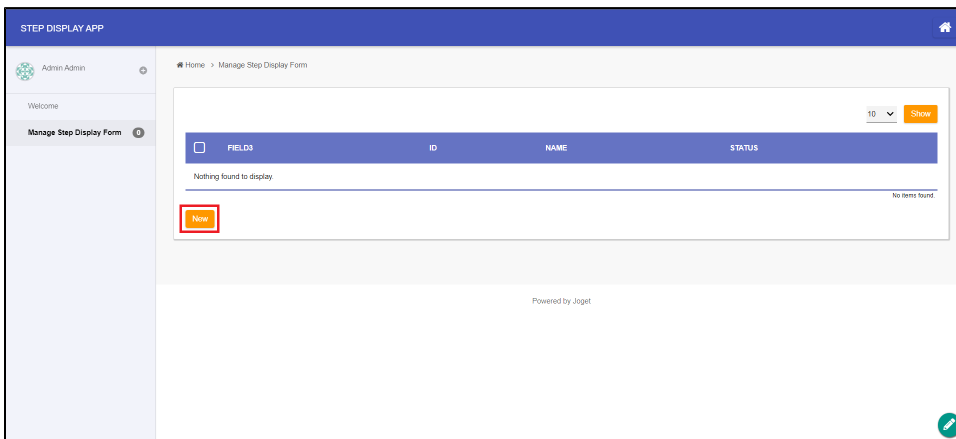

7. Click the **GENERATE APP** button and generate a **CRUD**.

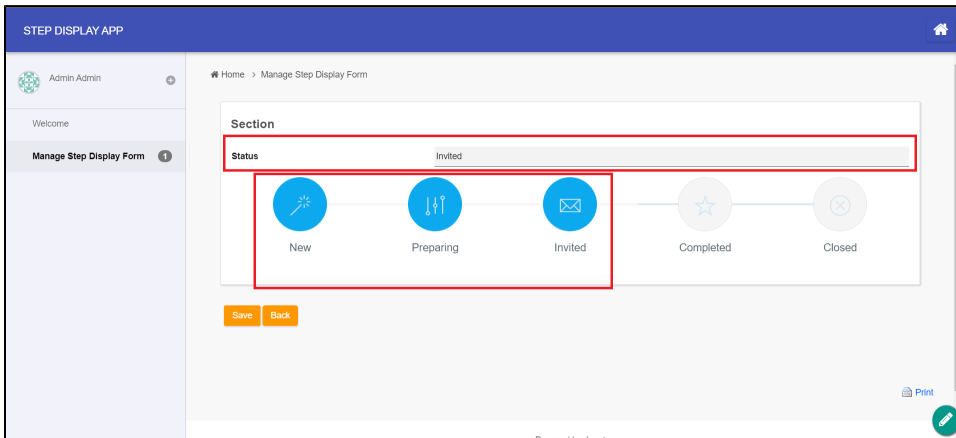

8. After creating the CRUD, launch the Step Display App Userview.

9. Go to the newly created form and click on **New** button.

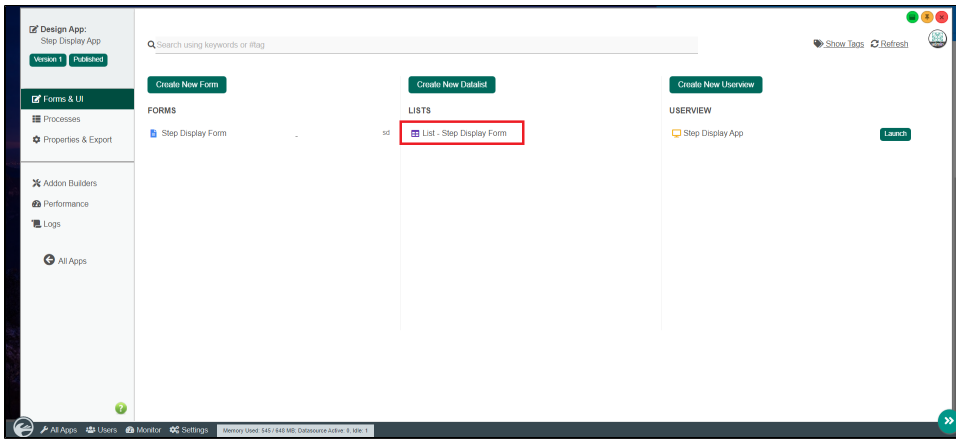

10. Fill up the status field with one of the values added in the status of Step Display form element and observe the results.

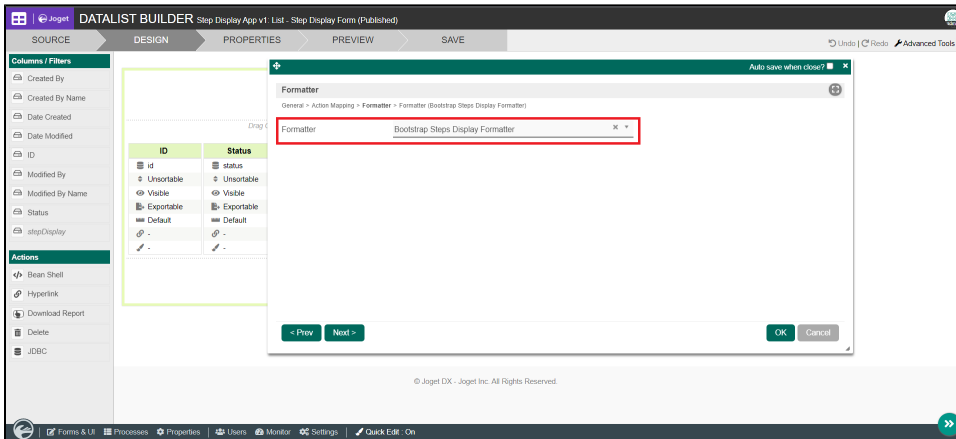

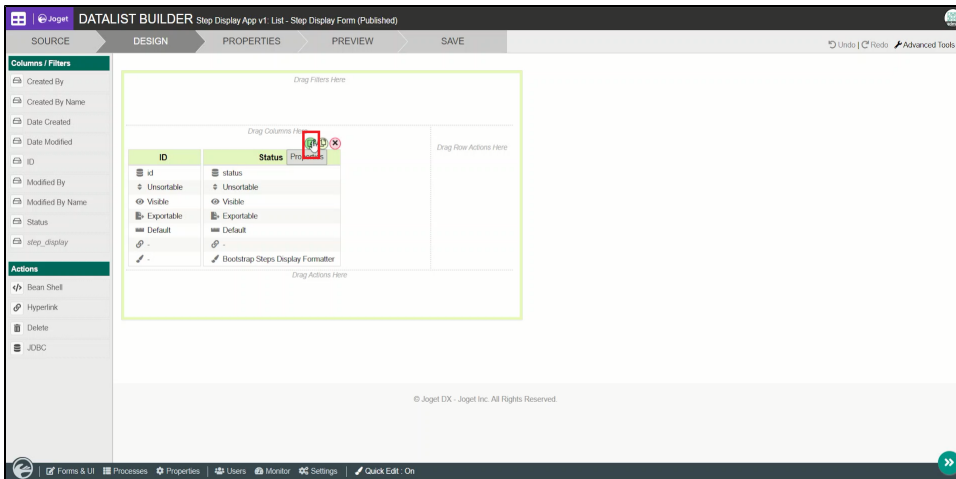

Steps To Use Steps Display Datalist Column Formatter Plugin

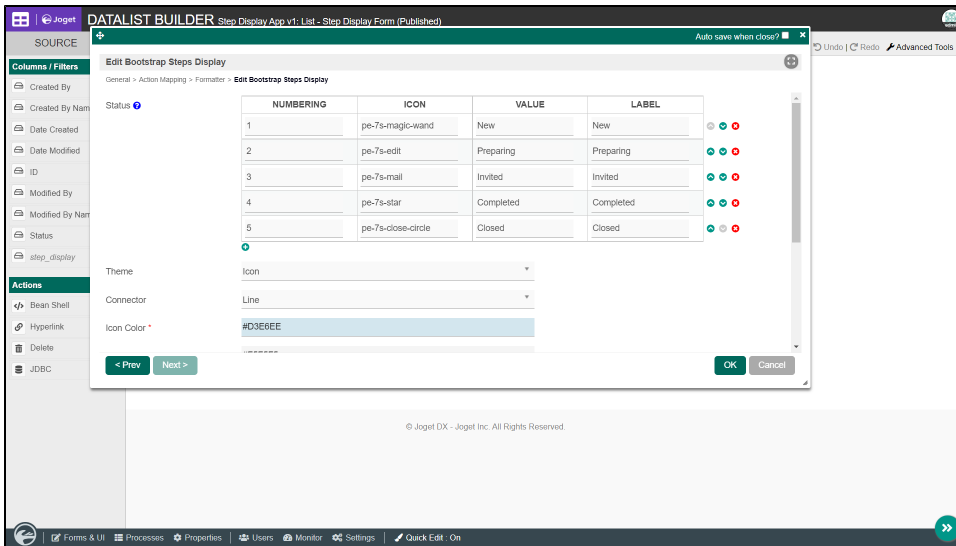

1. To use the plugin as a datalist column formatter, edit the List - Step Display Form.

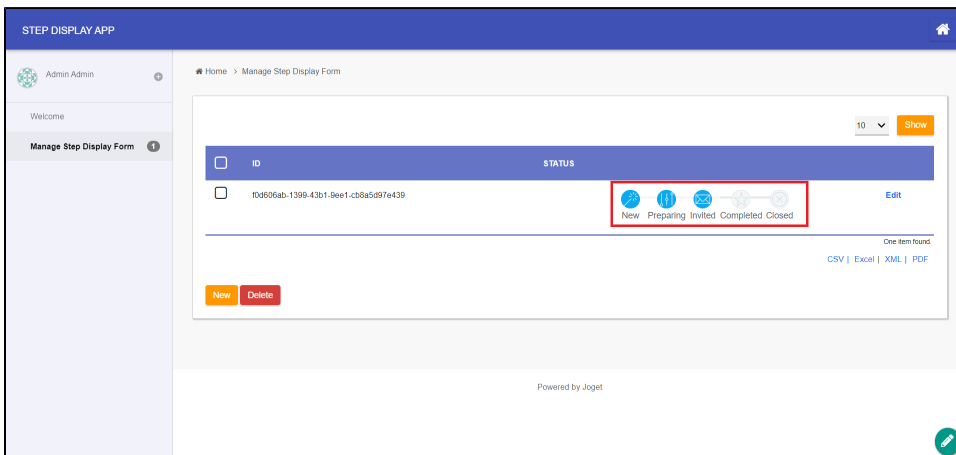

2. Edit the **status** column and add the Bootstrap Steps Display Formatter.

3. Edit the column by adding status accordingly and selecting color then save the form.

4. Add a new record to the datalist and observe the results.
