

Web App Log Viewer

- Introduction
- How do I view the System Logs in the web console?
- How do I view the App-specific Logs?
- Web App Log Viewer properties
- BeanShell Exception Handling

Introduction

Web App Log Viewer enables the administrators to view the logs on the web console for viewing and finding errors.

There are 2 types of logs:

- System Logs - displays system-wide log information and errors as well as all Apps
- App-specific Logs - displays log information and errors related to the selected App

How do I view the System Logs in the web console?

Monitor Apps

Steps

1. Log in as an administrator

2. Open up the [Administrator Bar](#)

3. Click on **Monitor**

4. Click on **System Logs**

How do I view the App-specific Logs?

Steps

1. Log in as administrator
2. Hover on an **app** until a pencil icon is displayed
3. Click on the scroll icon to access the **App Composer**
4. Click on **Logs**

Web App Log Viewer properties

Name	Description
Download	Download the log file
Follow	Displays all newly added lines from a log file in real time on the web console.

New Feature

BeanShell Exception Handling

This is a new feature for Joget DX version 8.1 onwards.

- Log error line number for easier debugging and tracing
