Universal Inbox Menu

Introduction

Universal Inbox Menu contains all the pending and assigned tasks of the currently logged-in user (regardless of App origin).

## Universal Inbox Properties

Configure Universal Inbox

Figure 1: Universal Inbox Properties

Label	Menu label. Mandatory field.
Menu ID	Item link slug. Optional field. **ⓘ Unique field** Value defined here must be unique to the rest of the UI Menus as the first matching name will be called upon.

UI

Performance & Offline

Figure 3: Cache Settings

Name	Description

Scope	Caching options are: - **None**: No caching. - **Application**: Cache content by application where all users will see the same content. - **User**: Cache by username.
Duration (s)	Duration in seconds to cache content, defaults to 20 seconds if applicable.

Performance
You can configure the **Performance** settings in this UI Element which allows one to cache existing content for improved performance and loading speed. Read more at Performance Improvement with UI Caching.

Figure 4: PWA Offline Settings

Note: PWA Offline support is dependent on the theme used.

Name	Description
Enable Cache for Offline Support	Enable caching for offline support, usually set for use on mobile browsers.
Cache All List Links in First Page	Enable caching for all list links in first page.

Read Progressive Web Application (PWA) for more information.
