PWA OFFLINE SETTINGS

PWA Offline support is dependent on the theme used.

☐ Enable Cache for Offline Support

Figure 4: User Profile Properties - Performance & Offline Settings

Name	Description
Scope	Caching options are: <ul style="list-style-type: none">• None: No caching.• Application: Cache content by application where all users will see the same content.• User: Cache by username
Duration (s)	Duration in seconds to cache content defaults to 20 seconds if applicable.

Read more at [Performance Improvement with UI Caching](#).

PWA Offline Settings

Note: PWA Offline support is dependent on the theme used.

Name	Description
------	-------------

Enable cache for offline support	Check this to enable caching for offline support, usually set for use on mobile browsers.
----------------------------------	---

Read [Progressive Web Application \(PWA\)](#) for more information.

Locale Settings

To allow the end user to choose their preferred locale settings, you can enable the "Enable User Locale Selection" option located in the General Settings section. Within the system, you can define the available locale options in the System Settings, providing the user with a selection to choose from. It is important to not leave any spacing when setting the "User Locale Options".
