Introduction

Delegate App Designer Role enables a selection of users and/or user groups to have administrator rights on a specific app.

These app designers will have access to modify anything within the specific app, i.e create/edit/delete forms/lists/Uls/processes, etc.

Get Started

Here is an example on how "Delegate App Designer Role" feature works, using the default bundled Expenses Claims app.

Steps

1. Start **Joget Server** and open the **App Center**.
2. Log in as **admin** and click on the pencil icon on the **Expenses Claim** to open the Design App. (see Figure 1). To reveal the pencil icon, hover the mouse cursor close to the Expenses Claims App icon.

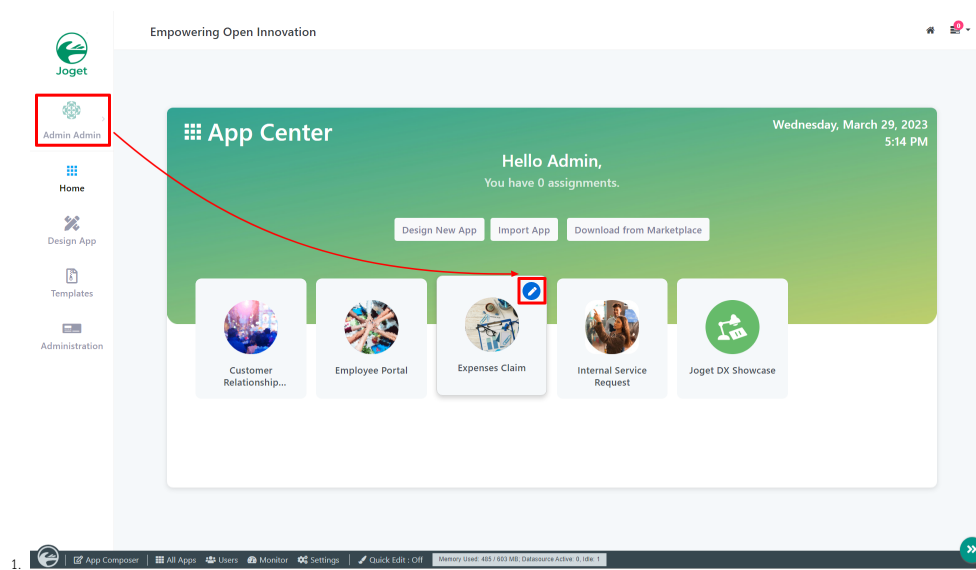

Figure 1

3. In the Design App, click on **Settings** button and it will display the **Properties** screen.
4. Click on **Delegate App Designer Role** tab to configure (see Figure 2)

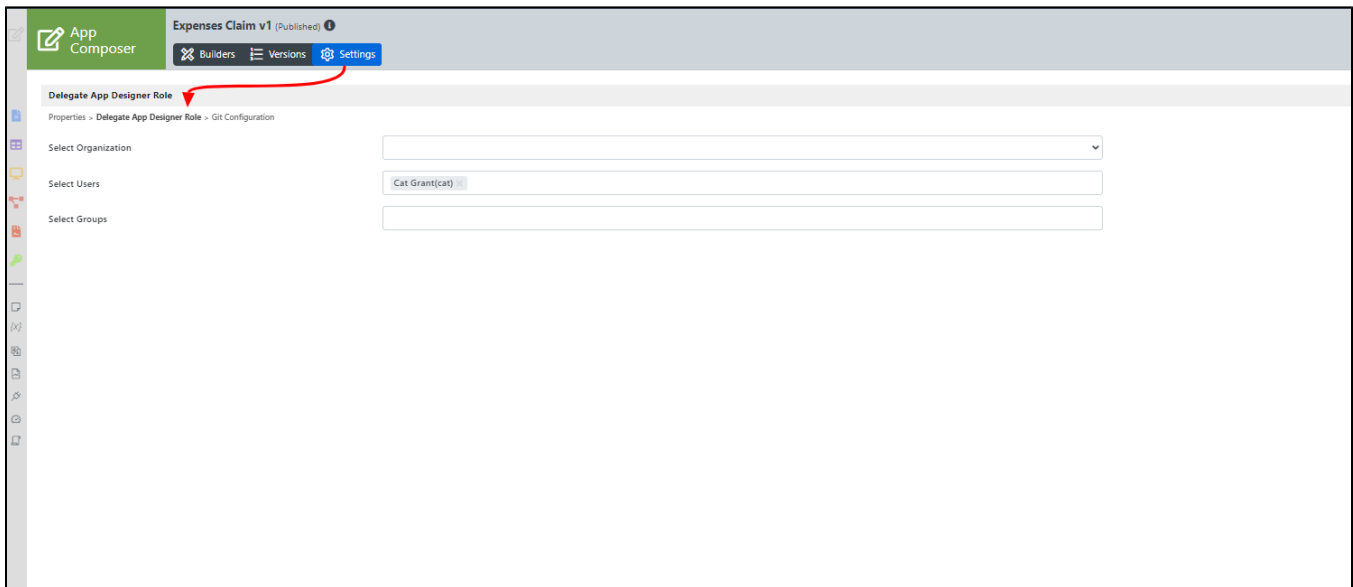

Figure 2

5. In the Select Users, select **Cat Grant** and click OK.
6. Log in as **cat** (default password is **password**).
7. Click on **Expenses Claim** to launch the App.
8. You will now be able to see the **Admin Bar** at the bottom right of the screen (see Figure 3)
