Description

This bundle contains a set of sample producer and consumer plugins for [Apache Kafka](#). For detailed instructions and an introduction to Apache Kafka, please refer to the blog article [Apache Kafka and Low-Code: An Introduction and a Practical Tutorial on Integrating IBM Event Streams and Watson IoT Platform with Joget](#).

This plugin source code is available in a new open source repository at <https://github.com/jogetoss/>. JogetOSS is a community-led team for open source software related to the Joget no-code/low-code application platform. Projects under JogetOSS are community-driven and community-supported, and you are welcome to contribute to the projects.

Plugin Info

Plugins Available in the Bundle:

1. Kafka Producer Tool
2. Kafka Consumer Audit Trail

This plugin bundle is compatible with Joget DX 8.

Installation

1. Download the plugin JAR file:
[joget-kafka-6.0.1.jar](#)
2. Upload the downloaded jar file through [Manage Plugins](#).
3. Map and configure the producer tool plugin to any [Process Tool/ Post Form Submission Processing Plugin](#).
4. Configure the consumer audit trail plugin under [Plugin Default Properties](#).
5. A sample app for Joget Enterprise Edition is available for download here.
[APP_kafka-2-20200120052531.jwa](#)
6. The source code for the plugin is available at <https://github.com/jogetoss/joget-kafka>.
