

UserviewUtil

- [Description](#)
- [Code Sample](#)
- [Methods](#)
 - [getTemplate](#)
 - [getTemplate](#)
 - [getUserviewMenuHtml](#)
 - [renderJspAsString](#)

Description

- [org.joget.apps.userview.service.UserviewUtil](#)
- Under wflow-core module
- Utility methods used by userview for rendering

Code Sample

The following script is used in a method of a Userview Theme plugin

```
import java.util.Map;
import java.util.HashMap;
import org.joget.apps.userview.service.UserviewUtil;

//following script is used in a method of userview theme
Map data = new HashMap();
data.put("theme", this);
data.put("message", "hello world!!");
String html = UserviewUtil.getTemplate(this, data, "/templates/userview/test.ftl");
```

Methods

getTemplate

```
public static java.lang.String getTemplate(org.joget.apps.userview.model.UserviewTheme theme, java.util.Map data, java.lang.String templatePath)
```

Method used to retrieve HTML template of an userview theme

getTemplate

```
public static java.lang.String getTemplate(org.joget.apps.userview.model.UserviewTheme theme, java.util.Map data, java.lang.String templatePath, java.lang.String translationPath)
```
