New Feature

This is a new feature in Joget DX 8.

Introduction

Columns is a page component which is customizable in width in three different views (Laptop/PC, Tablet, Mobile), also it has event listening. You can edit the style of each column separately through styles.

Column Width (Tablet)	Column Width in Tablet View
Column Width (Mobile)	Column Width in Mobile View
Add	Add more column
Stacks Columns In Mobile View	Stacks Columns In Mobile View when checked
Gutter	Gutter is the padding between your columns

AJAX & Events

Events are fundamental to creating interactive and dynamic web pages and AJAX enables the development of more dynamic and interactive web applications without the need to reload the entire page.
