

# Label Page Component

New Feature

Label is a new feature in **Joget DX 8** Page Components.

## Introduction

The **Label** is one of the new page components introduced in **Joget DX 8**. The **Label** works the same as the Labels in the **UI Elements**. One can drag and drop the **Label** and configure the properties.

To use the **Label**, drag and drop the **Label** element onto the canvas as shown in Figure 1.

Name	Description
Label	The field to key in the label. Text format and colour can be customized.
ID	Custom ID for the Label

AJAX & Events

Events are fundamental to creating interactive and dynamic web pages and AJAX enables the development of more dynamic and interactive web applications without the need to reload the entire page.
