

# Map Participants to Users

Each participant declared in Process Designer would have its mapping configured here. There are various options available to define the participants.

Map Participants to Users

Map Activities to Forms

Map Tools to Plugins

Variable List

This is the list of participants defined in the Workflow design.

Claimant

ID : claimant

Type	Performer
Value	Activity Definition ID :runProcess
	Remove Mapping

Approver

ID : approver

Type	Performer's HOD
Value	Activity Definition ID :runProcess
	Remove Mapping

Finance

ID : finance

Type	User
Value	admin
	Remove Mapping

Process Start White List

ID : processStartWhiteList

Type	Role
Value	Everyone (Including Anonymous)

Figure 1: Map Participants to Users

## Process Start White List

**Process Start White List** defines who is permitted to start the process. By default, everyone can start the process. But when configured, only those found in the mapping will be allowed to do so.

## Mapping Options

### Map to User or Group

### Map Participants to Users - Claimant (claimant)

Map to User or Group

Map to Org Chart

Map to Workflow Variable

Map to Plugin

Map to Group

Map to User

Filter By Organization

Search

	Group ID	Group Name	Group Description	Organization
<input type="checkbox"/>	G-002	CxO		
<input type="checkbox"/>	G-003	hrAdmin		
<input type="checkbox"/>	G-001	Managers		

Figure 2: Map to User or Group

One may map a participant to a selected user(s) or group(s). By doing so, every time a new activity is created in the participant's swimlane, Joget will pick up the same resultant user(s) to be assigned as assignee(s).

**Inactive User**

If the user mapped is **inactive** at the time of assignment is made, the particular user will not be assigned.

**No valid user found?**

If there's no valid user found to be assigned to at the time of assignment is made, the activity will be assigned to the current logged in user (previous performer).

Map to Org Chart

### Map Participants to Users - Claimant (claimant)

Map to User or Group

Map to Plugin

Map to the Performer

Map to a Head of Department (HOD)

Map to an entire Department

☒ Performer
 ☐ Performer's HOD
 ☐ Performer's HOD (Ignore Report To)
 ☐ Performer's Subordinates
 ☐ Performer's Department

Where the performer executed:
 

Previous Activity

Submit

Figure 2: Map to Org Chart

One may also map to a participant in relation to the reporting organization chart and the performers/participants in the process flow.

For example, we are trying to determine the participant that will be approving a claim. The person to approve a claim will be the HOD of the person that submitted the claim. Therefore, the setting would be **'Performer's HOD** where the performer executed **Submit Claim**"
