Run Process

Process name: **Expense Approval Process**

```
graph TD
    subgraph Claimant
        Start(( )) --> EditClaim[Edit Claim]
        EditClaim --> Resubmit[Resubmit]
        Resubmit -- "status=Resubmit" --> ApproveClaim[Approve Claim]
    end
    subgraph Approver
        ApproveClaim --> Route1{Route 1}
        Route1 -- "approved (approved)" --> VerifyClaim[Verify Claim]
        Route1 -- "status=Rejected" --> NotifyAppr[Notify Approver Rejection]
        NotifyAppr --> Resubmit
    end
    subgraph Finance
        VerifyClaim --> Route2{Route 2}
        Route2 -- "verified (verified)" --> NotifyFinVer[Notify Finance Verified]
        Route2 -- "status=Finance Rejected" --> NotifyFinRej[Notify Finance Rejection]
    end
    subgraph System
        UpdateRec[Update Record Status to Submitted] --> EditClaim
        UpdateRec --> ApproveClaim
        NotifyFinVer --> End1(( ))
        NotifyFinRej --> End2(( ))
    end
```

The **Run Process** option available at the Process tab allows the administrator/App Designer to quickly start a process instance of the current displayed process. The intended use case is to verify the process before publishing the App.
