Applying a custom font

To apply a custom font to the Report, set an HTML Field on the report and apply the following script:

HTML

```
<link rel="preconnect" href="https://fonts.googleapis.com">
<link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
<link href="https://fonts.googleapis.com/css2?family=Courier+Prime:ital@1&display=swap" rel="stylesheet">
<style type="text/css">
  .form {
    font-family: 'Courier Prime', monospace;
    font-style: italic;
  }

  @media print {
    * {
      font-family: 'Courier Prime', monospace;
      font-style: italic;
    }
  }
</style>
```

The script applies the "Courier Prime" font on the form and the generated report PDF. You can adjust the script accordingly to match your requirements.
