

Cardano Default Backend Plugin

To operate the Cardano plugin pack on the **Preview Testnet** or **Pre-production Testnet**, please create a Blockfrost Profile.

See <https://blockfrost.dev/overview/getting-started>.

- [Plugin Properties](#)
 - [Configure Cardano Default Backend Configuration](#)

Introduction

This plugin allows you to conveniently centralized the backend configuration for **all** Cardano Blockchain plugins **within the app**.

It is recommended to use this plugin to avoid duplicating backend credentials across multiple Cardano Blockchain plugins.

Plugin Properties

Configure Cardano Default Backend Configuration

Name	Description
Network Type	<p>Select the network to create an account on:</p> <ul style="list-style-type: none">• Mainnet• Preview Testnet• Pre-production Testnet <p>"Mainnet" uses assets with actual monetary value.</p> <p>Please use the testnets for testing purposes.</p> <div>"Mainnet" uses real-world value. Please use "Preview Testnet" or "Pre-Production Testnet" for testing purposes.</div>
Backend Service	<p>Select the backend service you wish to use to execute your blockchain queries/transactions with:</p> <ul style="list-style-type: none">• Blockfrost• Koios
Blockfrost Project Key	<p>This property will only appear when Backend Service is Blockfrost.</p> <p>Blockfrost project key can be retrieved from your Blockfrost account after registering a Blockfrost account. Adding a project will auto-generate a Project ID key to access Blockfrost services.</p> <p>Paste in your generated mainnet/testnet Project ID key.</p> <div>Blockfrost API key and Project ID are the same.</div>
