Multi Paged Form

Definition
Multi Paged Form enables one to incorporate **multiple forms in one single form**, in a simple and elegant way.

New Feature
This feature has been enhanced in Joget Workflow v6.   1. AJAX Rendering

Figure 1: Multi Paged Form element

Figure 2: Multi Paged Form Properties

Name	Description
ID	Element ID.
Number of Pages	Number of pages to be presented in Integer.
AJAX Rendering?	Renders page only when clicked. This option improves loading times if end user does not use all the forms and number of pages is large.

Figure 3: Multi Paged Form Properties – Page

Name	Description
Label	Page name displayed in the form of breadcrumb or tab, depending on its setting in the UI.
Form	Target Form.
Readonly?	Determines if the page is editable.
Display field as Label when readonly?	Displays the value of the element as plain text when element is set to "Readonly".
Parent Form Field to keep Child Form ID	ID of the field in the parent form to store the page's primary key. Page data will be loaded based on the record ID retrieved from this field.
Child Form Field to keep Parent Form ID	ID of the field in the page form to store the parent form's primary key.
Validate when change page	Performs validation upon changing pages if checked.

> ⓘ **Important Note about Parent Form Field to keep Child Form ID**
>
> This field must be specified if the individual form is not storing into the same table as the parent form.
>
> Field specified does not need to be first created in the parent form.

Figure 4: Multi Paged Form Properties - Advanced Options

Name	Description
Partially store form when page changed?	Partially store form when user navigates between pages.
Store main form data when partial storing is enabled?	Store main form data when partial storing is enabled. ⓘ This option is available when "Partially store form when page changed?" is enabled.
Display Mode	Determines if the multi-paged form will be displayed in wizard or tabs.
Previous Button Label	Previous Button Label.
Next Button Label	Next Button Label.
Only enable submit button on last page?	If checked, all of the pages' forms must be completed before form submission or task completion.
CSS	Custom CSS implementation.
